## A BILL

To provide for the coverage of medically necessary food and vitamins for digestive and inherited metabolic disorders under Federal health programs and private health insurance, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*

2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Medical Nutrition Eq-

5       uity Act of 2017”.

6       **SEC. 2. FINDINGS.**

7       Congress finds the following:

1                         (1) Specialized food is often medically necessary  
2                         for the safe and effective management of many di-  
3                         gestive and inherited metabolic disorders that impact  
4                         digestion, absorption, and metabolism of nutrients.

5                         (2) Although medically necessary food is essen-  
6                         tial for patients, it is often expensive and not uni-  
7                         formly reimbursed by health insurance, leaving many  
8                         families with an insurmountable financial burden.

9                         (3) As a result, many patients who cannot af-  
10                         ford medically necessary food may experience ad-  
11                         verse health consequences from suboptimal disease  
12                         management, including hospitalization, intellectual  
13                         impairment, behavioral dysfunction, inadequate  
14                         growth, nutrient deficiencies, and even death.

15 **SEC. 3. COVERAGE OF MEDICALLY NECESSARY FOOD AND**  
16                         **VITAMINS FOR DIGESTIVE AND INHERITED**  
17                         **METABOLIC DISORDERS UNDER FEDERAL**  
18                         **HEALTH PROGRAMS AND PRIVATE HEALTH**  
19                         **INSURANCE.**
